

Descriere Platforma Tranzactionare electronica webTrader

Platforma de tranzactionare a fost construita pentru o cat mai mare flexibilitate acordata clientilor. In acest sens aplicatia functioneaza din pagina de web astfel incat clientii se pot conecta de la orice calculator conectat la internet. Pentru o functionare optima si in functie de preferintele configurate de fiecare client sunt recomandate conexiuni cu o latime de banda intre 64 si 128 kbps, iar sub aspect tehnic un sistem de calcul minimal echivalent PentiumIV cu 256MB RAM cu rezolutia ecranului de 1024x768.

Piata Futures si Options BMFM SIBIU

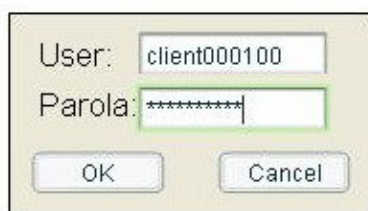

Platforma are multe nivele de conectare:

- client
- grup
- broker

Conectarea la sistemul de tranzactionare se face pe baza unui utilizator si a parolei de conectare primite de la agentia la care sunteti client sau broker.

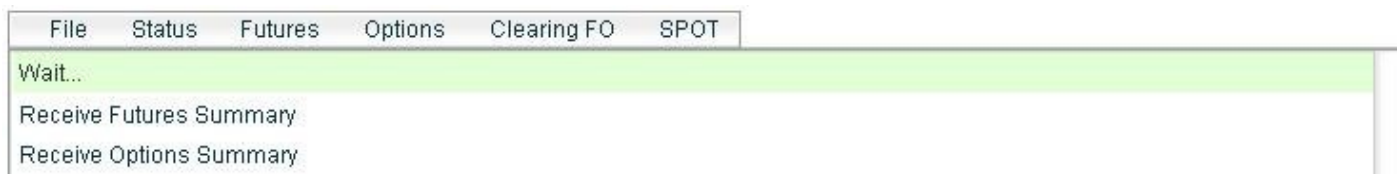

Alegeti din meniul File --> Connect Derivate

A screenshot of a login dialog box. It contains two input fields: 'User:' with the text 'client000100' and 'Parola:' with a masked password '*****'. Below the fields are two buttons: 'OK' and 'Cancel'.

Dupa ce ati introdus utilizatorul si parola o sa obtineti unul din ecranele urmatoare

In cazul in care introduceti un utilizator sau o parola gresita va fi returnat mesajul: "Wrong User or Passwd", iar in cazul in care datele introduse de dumneavoastra sunt corecte obtineti urmatorul mesaj:

reprezinta sumarul pietei futures.

Pe prima linie a acestui tabel se afla informatiile referitoare la fiecare coloana disponibila, iar in continuare fiecare linie reprezinta o piata cu toate informatiile adiacente necesare.

contract - tipul de contract

settleDate - scadenta pentru tipul de contract afisat in prima coloana

BestBid - cel mai bun pret de cumparare

BestAsk - cel mai bun pret de vanzare

Settle - cotarea data de ultimul deal pe piata curenta

Open - pret de deschidere

High - cel mai mare pret

Low - cel mai mic pret

Change - modificarea de pret

Trades - numar de dealuri

Trades - numar de contracte tranzactionate

OpenInt - numar de pozitii deschise

Status - statutul curent al pietei (Open, Close)

Sync - daca o piata este sincronizata, atunci informatiile afisate legate de acea piata vor fi complete, iar daca nu este sincronizata informatiile vor reprezenta doar datele care au fost adaugate, modificate sau sterse de cand s-a realizat conectarea

NOTA: indiferent daca o piata este sincronizata sau nu, sumarul pietei este corect.

Zona centrala e ecranului este impartita in trei componente care reprezinta (de la stanga la dreapta):

- adancimea de piata pentru cumparare pentru piata selectata in Futures Market

- adancimea de piata pentru vanzare pentru piata selectata in Futures Market

- deal-uri realizate pentru piata selectata in Futures Market

Adancimea de piata

Atat in fereastra de buy, cat si in cea de sell coloanele reprezinta:

Contracts - numarul de contracte cerute/oferite spre cumparare/vanzare

Price - pretul de cumparare/vanzare

Client - daca sunteti "Client" o sa observati codul dumneavoastra de client in locul "*", daca sunteti "Grup" o sa vedeti codurile celor din grupul dumneavoastra, daca sunteti "Agentie" o sa vedeti codurile pentru clientii agentiei, iar daca sunteti "Broker" o sa fie disponibile codurile pentru toti clientii Societatii pe care o reprezentati

SN - seria ordinului adaugat

Fereastra Deal

Contracts - numarul de contracte implicate in tranzactie

Price - pretul la care s-a realizat tranzactia

Buyer - "*" daca sunteti cumparator/vanzator sau codul clientului dupa modelul explicat la Adancimea de Piata.

Type - tipul de tranzactie

Time - momentul la care a fost realizata tranzactia

In partea de jos a ecranului avem doua zone importante:

In partea stanga Ticker Futures, iar in dreapta fereastra de adaugare a ordinelor.

Tabul Add Orders permite completarea unui ordin ce urmeaza sa fie trimis in piata. Astfel la CodClient se poate selecta contul BVB al clientului, se selecteaza de asemenea un simbol si o piata, se selecteaza daca ordinul este cumparare sau vanzare, se completeaza volumul dorit, pretul si tipul ordinului (Day sau Open). Odata completate, apasand butonul Add, aceste date vor fi transmise catre un terminal Arena, unde un broker va da sau nu curs ordinului. Pana cand la acest terminal se va lua o decizie, ordinele vor aparea in tab-ul urmator (Pending Orders).
